

The XM Instant Traffic & Weather channel are very necessary and helpfull. I was traveling this week and needed to know the weather as well as traffic updates and I was able to get them instantly by using my XM radio; which is something that I would not have been able to do without XM since I don't know the stations in the area in which I was traveling. Also with XM I can get this information with the click of a button with out taking my eye off the road. Without it I would have had to search for this type of station in that area. When you are traveling from state to state, these stations help you with any updates that you might need. Please do not do away with the stations on XM radio.
